BULLETIN NO. 2

STOCK UNSOLD MARCH 19, 1921

SHENANDOAH, - IA.

¶ Send us your list of wants. On some items in quantity we can quote lower than printed prices.

For Your Information

To those who are not acquainted with our concern, would say that this business was established in 1870, and is still under the same management.

We are located in Southwestern Iowa, fifty miles southeast of Omaha, Nebraska. The soil here is especially adapted to the growing of a general line of nursery stock. The railroad facilities are excellent. We are on the Wabash, Chicago, Burlington & Quincy, Keokuk & Western railroads. We take pleasure in showing visitors over our grounds at any time.

TERMS OF SALE

SHIPPING—With the exception of Evergreens and some heavy shade trees we are in position to ship assorted orders all through the winter, and can, as a rule, get refrigerator service, although we do not guarantee this. Can begin to dig trees in this latitude usually about March 10. Parties ordering goods should indicate whether they wish them sent by freight, express or parcel post, also route. In the absence of these instructions, we forward them to the best of our judgment, but in no case will we assume responsibility after consignment to purchaser. When losses occur by delays or other causes of whatever nature while goods are in transit, make claim AT ONCE on the forwarding companies. All shipments travel at the risk and cost of the purchaser.

TERMS—Cash or security before shipment of goods, except with established firms, when, if unknown to us, satisfactory references will be required before goods are forwarded. Orders to be sent C. O. D. should be accompanied by one-fourth cash.

PRICES—Are limited to Spring 1921 and supersede all previous lists and are subject to change without notice. WE ARE ALWAYS GLAD TO QUOTE PRICES BY LETTER ON LARGE LISTS OF WANTS.

CAUTION—We accept all orders upon condition that they shall be void should any injury befall stock from frost, fire, hail storms or other causes over which we have no control.

CLAIMS—For any cause will receive consideration only when made within ten days after the arrival of goods. In no case will we entertain claims made after the goods have been once accepted.

PACKING—Prices contained herein are net; cost of boxing and baling will be added. No charge is made for loading bulk cars.

GRADES—We grade carefully; in some cases by caliper, in others by height. When graded by both caliper and height, the caliper must govern.

CERTIFICATE OF INSPECTION—Will be furnished with each shipment.

GUARANTEE OF GENUINENESS—If any nursery stock, etc., proves untrue to description under which it was sold, we hold ourselves in readiness on proper proof, to replace all such nursery stock, etc., that may prove otherwise or refund the amount paid, but we shall in no case be liable for any sum greater than the amount originally received for said nursery stock.

FRUIT TREE STOCKS—AMERICAN GROWN

Our Apple Seedlings were grown on new land, thoroughly cultivated during the summer, frequently sprayed and are absolutely free from insects or diseases. We never grew better.

Will exchange for such stock as we need.

We have an assortment of Apple Seedlings in storage at ROCHESTER, NEW YORK. Write for box list and low prices.

FRUIT TREE STOCKS—Continued

FRENCH GROWN

Our imported fruit tree stocks are in prime condition and we can fill orders promptly. Myrobolan and Mazzard, in the different grades, are very scarce on the market but we have a fair supply. Order at once and state if out of grade ordered, we shall use a larger or smaller grade at corresponding prices.

We are not agents for French nurserymen, but have our own resident representative in France who has our seedlings grown for us on contract by men who make a specialty of growing fruit tree stocks.

We wish to call special attention to the fact that these goods are sold NET AT SHENANDOAH. We take all the risks of transportation and pay all charges from France to this place. This is a very important point for customers to remember. Sometimes there is quite a loss in these long shipments, but this does not affect the customer as we open the boxes and grade out the damaged seedlings and guarantee our stock to be in good condition when it is delivered to the forwarding agent at Shenandoah. A government inspector is also stationed at Shenandoah most of the winter and he inspects all imported stock.

ROOT GRAFTS

Unless you have experienced help, you will find it cheaper and better to have us do your grafting. We have a large force of expert men, who devote their time during the winter months exclusively to this department. The grafting cellars are located close to our office and no part of our business receives more careful personal attention.

We are prepared to put up grafts of any style or length wanted, and make the price accordingly. We use the best of materials; orchard scions are used extensively and selected hardy seedlings grown by us from the best crab seed that we can procure.

Each order is grafted by itself and packed separately until shipped. They are repacked and inspected several times during the winter so they are in the best of condition at shipping time.

Grafts should be planted out early in the spring in well prepared ground. In our own planting we set them about eight inches apart in the row, making the row three feet six inches wide. It is very essential that the earth be well pressed about them.

As our grafts are put up in bunches of one hundred, do not order a less amount of any one variety. We will be glad to mail samples upon request.

APPLE AND CRAB PIECE ROOT GRAFTS

Piece root grafts are made by using about six inches of scion and three and one-half inches of root. They are tongued together and securely wrapped at the union, with waxed thread, making the entire graft about eight and one-half inches long. This style of graft we use mostly in our own planting.

|---------------------|----------|
| | Per 1000 |
| 5,000 and up | \$15 00 |
| 1,000 to 5,000..... | 20 00 |

APPLE AND CRAB WHOLE ROOT GRAFTS ON NO. 1 STRAIGHT SEEDLINGS

This style of graft is made by using about six inches of scion and the entire seedling making union at the collar and wrapping with waxed thread which holds it firmly until calloused. Many nurserymen prefer to plant this kind of graft, claiming that they get a larger growth owing to the well formed root system.
